

OUR VALUES

The following values are seen as being central to the life of our school and how all members of the school community should take responsibility to conduct themselves:

- **Courage** - the strength to do what is just and right for the great benefit of self and all
- **Kindness** - exhibit respect, friendliness, generosity and consideration in all interactions
- **Creativity** - the ability to use the imagination or create original ideas for a desired purpose
- **Personal Best** - to strive for achievement that is better than anything you've achieved before, to engender a desire and respect for continual improvement.

As a school community, we attempt to apply these in our everyday dealings with one another and in the development of our programs and policies.
