

## How to download Tiqbiz on your mobile or other device

According to your type of mobile, you will need to download Tiqbiz in your Play Store or App Store (you can also download Tiqbiz on your desktop, laptop, tablet or whatever device you are using).

If you are downloading Tiqbiz on your mobile, this is what the green icon looks like:

Follow the prompt to download and set up the application.

Most of the information we deliver to parents will arrive via Tiqbiz. Tiqbiz is also where you tell us when your child is absent, where you can contact the school (we will receive it as an email) where you will book your parent-teacher interview, where you can see the calendar and also where you can access our webpage and newsletter.

If English is not your first language, you can choose to read the messages in your mother tongue. If you click your “profile” icon you can click on “translation” and choose your language among 87 different languages. The translation may not be a good one because computers are not as apt at language translation as humans, but it will give you a better idea of what the content of the message is.
